

## THE HAT CONFORMATEUR BY AILLIÉ-MAILLARD, AROUND 1880

REF: 1882

### DESCRIPTION

The hat "conformateur" invented in France in 1852 by Allié-Maillard, used for over a century to measure the head circumference and to register the mark on a paper card, which will precisely match any hard hat (boater, top hat, melon, etc..) to its future wearer. Previously, the hatter preserved the print of each customer in his file.

Dimensions: 18 cm H x 29 cm W x 33 cm L
